Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fail to teach or suggest individually or in combination a system a method of performing a computation in a programmable processor, the programmable processor having a first memory system having a first data path width, and a second memory system and a third memory system each of the second memory system and the third memory system having a data path width which is greater than the first data path width. Each independent claim identifies the uniquely distinct features: "copying two memory operands portion from one memory system to another system, and forming first catenated data and second catenated data and performing a computation of a single instruction using the first catenated data and the second catenated data (as per claims 1, 8, 16 and 23). The above limitations of the present claims invention have not found to be anticipated, suggested or made obvious by the prior art of record, either singularly or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
